

SECURITY OF BUILDINGS, EQUIPMENT AND SUPPLIES

Buildings under the control of the County Board of Education and equipment under the control of the County Superintendent of Schools shall have effective security and surveillance.

The establishment of such security and surveillance shall be developed by the County Superintendent of Schools and staff members and approved by the County Board of Education. When necessary, the County Superintendent of Schools may utilize the services of security consultants and agents in developing and maintaining effective security and surveillance.

Periodically, but no less frequently than annually, the County Superintendent or a delegated staff member, will describe security and surveillance measures for buildings, equipment and supplies and review any pertinent events relative to security and surveillance.
