SESSION SUMMARY

During this session, the focus was on:

- Analysis of current goals, needs, and outcomes.
- Explanation of the budget building using the concept of additional funds as complementary to the basic services provided to all students (facilities, teachers, materials, etc).
- Opportunity to work as a team to note any potential revisions to current goals.

A worksheet was provided for teams' use regarding the types of data necessary for progress monitoring of each goal. This information will be useful when completing the annual update of the new LCAP template. The second part of the worksheet was available for teams to begin creation of action plans in order to update their LCAP.
