

LCAP Implementation Plan

Goal # ____:

Action/Service	Person Responsible	Timelines/Dates for Implementing Action Steps	Metrics/Evaluation	Review of the Progress Toward Goals, Assessment of the Effectiveness of the Actions and Description of Changes to the Specific Actions
<p>Essential Questions <i>Is the Action/Service Explicit? Do we need to add language/steps to clarify the action?</i></p>	<p>Essential Questions <i>Will the responsibility for action steps be divided up between members of the leadership team?</i></p>	<p>Essential Questions <i>Have all actions and sub-actions been calendared? When will progress on the action steps be shared with the leadership team? When will data be shared with each of the stakeholder groups for input?</i></p>	<p>Essential Questions <i>Which Data/Metrics (Expected Annual Measurable Outcomes) will be used to identify the impact of this action? (effectiveness) As Leadership Team monitors progress of data, have we set/determined interim targets to assess whether or not we are on track (i.e.. If we expect to gain 5% increase in students reading at grade-level, at the mid-year data collection has reading improved? By how much? Are we on track to meet end-of-year target?)?</i></p>	<p>Essential Questions <i>What does the data tell us in terms of the effectiveness of the actions? What evidence do we have that the action/service was completed/implemented? Will we continue or stop this action/service, because 1) we met the intended outcome or 2) determined the action/service was not effective or not showing sufficient progress towards a measurable outcome or because 3) input from stakeholders changed the direction/focus of the district? How will we make decisions about mid-year adjustments (i.e. not abandon an action step, but adjust)?</i></p>
